'To do some shopping' she sweetly said.
'And where?' I asked in glad surprise,
'Oh, anywhere where they Advertise.'
So she took the UNION and glanced it over
To find the advertisement of some Grocer.
But she looked in vain and tired her eyes,
And said 'alas! why don't they ADVERTISE!'

AMERICAN SYSTEM OF INTERCHANGEABLE TYPE BODIES.

INVENTED BY

ENGLISH AND GERMAN

MARDER, LUSE & CO.,
TYPE FOUNDERS, CHICAGO & SAN FRANCISCO,
Manufacture TYPE BORDERS & Brass Rule on the COMMON SENSE PLAN.
Also Dealers in Printers' Supplies in General.

OUR SYSTEM

Briefly explained, is as follows: The unit of measurement for all Type bodies, is American, which is exactly one-twelfth of Pica. This is the smallest and is applied only to Leads and Rules. All the other bodies bear exact relations to this as indicated by numbers. From American to Nonpareil, which is numbered 6, they increase progressively by one-half the body of the first. Beyond this, to Pica, by an increase the size of American. There are no bastard or irregular sizes.

Each size is a factor. Three Nonpareils (6) are a Great Primer (18); three Breviers (8) are a Double Pica (24); a Nonpareil (6) and a Brevier (8) are an English (14), or Two-line Minion; a Pica (12) and an Excelsior (4)—two 6-to-Pica Leads—are a Columbian (16); a Double English (28) and a Brevier (8) are a Double Great Primer (36); so with all of the other sizes, making the combination of two or more sizes of type in a word or line, the simplest thing imaginable in composition. That odd body, Bourgeois (9), is now a respectable size, being a Nonpareil (6) and one-half exactly.

Look over the figures and test the simplicity of the new system of Type bodies.
